Fixed a problem with waypoint a path. Fixed a map drawing problem. Fixed view of ampersands on the map. Fixed a problem with creating waypoints on some features. Changes from version 6.15.11 to 6.16.1: Added support for 64-bit USB device drivers. Added generic label descriptions (less "unknownÂ" features). Added support for import relevant data from TCX files. Added very small and very large selection of symbol sizes. Added support for changing waypoint address phone number information. Added the New Zealand TM grid. Added the display of the total length of all selected binaries/paths in the status bar. Added numerical sort paths, tracks, and waypoints. Adding the ability Send error reports directly to Garmin after a crash. Improved memory problems when MapSource is running Windows 7. Improved map projection for many map products. Speed improved phase of âfinalization' during data transfer to SD cards. Modified Functionality of the mouse wheel to zoom in and out. Changed option Â"seasonal closuresÂ" to Â"date and time closures.Â" MapSource now instraderÃ on roads that have closing times and seasonal if this circumvention option is not selected. Changed the path using the dot symbol to small black dot. Corrected various categories and subcategories that have influenced the search operations and the display of categories and subcategories POI. Fixed some self-routing quirks. Correct remembering the search category of the âFind Nearest' dialog box. Fix problems with the Â"Save AsÂ" dialog box Some cases, the existing files were overwritten without asking). Correct some problems with the Swedish network. Fixed the problem with the search for address when a name of city was provided. The loss of mixed characters is correct during the transfer of the paths to some USB devices. Fixed a problem with updating the dialog box to avoid the path. Fixed a problem with the search for elevation elements. Fixed a problem in which the comment field was not corrected after the creation of a Waypoint da Da Find the result. Fixed a problem that the transfer of data from a mass storage device could not. Changes made from version 6.15.7 to 6.15.11: improved performance for customized design elements. Make sure the â € â € Ã geotagged photo 'do not block Mapsource. Allowed the import and export of unlock codes. Make sure that the unlock changes propagate without having to restart application. The telephone numbers imported from GPX files have not been rewritten. This is now repaired. Added to support for greater safety of maps. Solved the unlocking problem. Search for 6 -level Asian addresses implemented. Improve the rejecting performance for some Asian cartographic products. Changes made from version 6.15.6 to 6.15.7: a problem solved for which maps could not be transferred to some Windows non -English installations. Reduced size of the symbols when configured to use small symbols. Fixed a problem in the search for campsites on some more recent maps products. Changes made from version 6.15.4 to 6.15.6: a problem solved with the file rescue window when the file extension field is hidden. Fixed a problem in which Mapsource blocked if the dialog box was displayed twice to avoid the path. Fixed the problem of the Waypoint category filter. Now only the Waypoints of the selected category will be displayed. Fixed Waypoint prefixes. Fixed a problem in which Mapsource blocked with some addresses. Foreign losses are correct in the Waypoint dialog box and in the rendering of the map. Correct a problem with saving GPX files when the file path contains Asian characters. Fixed some hotkey problems. Fixed a problem with the search for certain points of interest. Fixed a problem .eppam .eppam enucla rep elacitrev oliforp li avartsom ehc amelborp nu otlosiR .etnerroc etnetu yrotcerid allen itallatsni itazzilanosrep tniopyaw led ilobmis i odnazzilitu amelborp nu otlosiR :4.51.6 alla 3.51.6 enoisrev allad etatroppa ehcifidoM .etnetuâllad otanoizeles olobmis led enoisnemid al eriuges rep tniopyaw enigammiâlled enoisnemid al atacifidoM .onailisarb esehgotrop ni beW otnemagelloc id inoisnetse el atroppuS .retneC gniniarT emoc inoizacilppa noc Ãtilibitapmocni avasuac ehc occolbs id icidoc ied enoizazziromem al route problems for routes containing one travel point more¹ than once. Fixed transfer to and from Garmin Mobile PC devices. Fixed a problem with opening gdb files containing routes with identical names. Ã fixed a problem where the anchor point symbol was not displayed correctly. Fixed a problem with scrolling maps. Fixed a problem with path travel time calculations. Fixed a problem with performing address searches. Fixed a problem with displaying map labels in print preview. Changes from version 6.14.1 to 6.15.3: Fixed an issue where blank map panes are left on screen. Ã a problem with redesigning the map after a change in the level of detail has been resolved. The design of roads has been improved to better distinguish primary and secondary roads. Added the possibility adjust the size of the icon symbol. Resolved the display of surveys in marine maps. Fixed a problem with areas that were marked inadvertently. The features have been corrected 'Move Path Point', 'Insert Path Section', and 'Extend Path' from shortcut menus. Fixed a problem with water regions being cut. Limited to 'closest' features to only the displayed maps. Some maps have overlapping copyright information corrected. Ã some Marine icons have been corrected in the 'Find the nearest places¹' dialog box. Fixed a problem with improper services that are displayed for 'PropertyÃ output' Changed the color used for bathymetric lines. Improves the appearance of dotted lines. Some labels are larger. Improved the appearance of road shielding icons. Fixed a problem during certain search operations. Ã resolved a problem where changing the font would not have resulted in the display of labels. Fixed a problem with using the Roads & Rec 2.1 Hawaii and Alaska product Changes made from version 6.13.7 to 6.14.1: Updated map rendering to provide visual enhancements. Added support for national and Swedish SWREF99 networks. Fixed the problem of setting the PC clock to Vista. User specified colors allowed for routes. Brazilian Portuguese translation added. Added two options to the routing preference ‘Try Avoid' list: Ferries and Seasonal Road Closure. Added support for multi-line comments for waypoints. Added a transfer preference to specify if (and which) serial ports should be searched for Garmin devices. This should solve problems for users who have misbehaved the internal modems that cause MapSource to crash. Added the ability to add songs from the Tracks page. Added Added Added color to the list on the Tracks page. The behavior of the Drawing Track tool has been changed to populate the elevation in the tracks if the map product has DEM elevation data. Several symbols (mountain top, city and airport) have been modified to be smaller, so as not to obscure the map. This only applies when the size of the large symbol is selected. The layout of several preference pages has been modified to improve usability. The behavior of several dialogs has been changed to ignore the grade symbol in user-provided coordinate strings. Fixed an issue when selecting map sets larger than 4 GB. Fixed an issue related to saving files to offline network drives. Fixed an issue with keeping line feeds within comments in GPX files. Fixed a printing problem when the product ‘No map' is selected. Fixed some line rendering issues in Blue Chart map products. Fixed a problem with some searches for zip code addresses that did not find results. Changes made from version 6.11.5 to 6.11.6: This version of MapSource no longer supports Windows 98, Windows ME and Windows NT. Fixed an issue when transferring map sets larger than 2 GB to units. MapSource supports transferring map sets up to 4 GB in size. Note that some units do not support map sets larger than 2 GB. A problem has been solved with the creation of a pass point from the Japanese address search result. Fixed a problem with MapSource not finding Google Earth Pro when installed. Changes made from version 6.11.3 to 6.11.5: Fixed some translation issues. Fixed a problem with the search for in NT map products. Changes from version 6.11.1 to 6.11.3: Fixed a problem when receiving GPX files containing contact points with phone numbers from Garmin mass storage devices, such as the Nuvi. Fixed a problem with some devices that do not turn off after transfers. Fixed a problem with the route directions that had the wrong direction in the name of the road/motorway. Enhanced support for Garmin Mobile XT devices. Better problem handling in the map product installation log. map. From version 6.10.2 to 6.11.1: Created version 3 of the Garmin GPX extensions. This review adds the support for the transfer of the color of the traces. The address and telephone number fields were also added for some Garmin units and are not supported by Mapsource. Added to support for transfer with Massa Garmin's storage devices, such as Nuvi. Support for the high speed USB Garmin data sheet programmer. Added to support for large format Garmin data cards, such as 512MB cards. Correct some Japanese translations. Correct a crash during research on European postal codes. Correct compatibility problems between some Garmin and Mapsource data data sheets. Correct management of links in the GPX documents for Waypoints, paths and traces. Correct a problem on NT maps showing the incorrect label for the boundaries of county and state. Clarified text that is displayed when you move on to a product maps with restrictions. Removed the conservation of the horizontal/portrait setting, because there was problems with some printers. Mapsource now uses the default printer settings for vertical or horizontal printing. To modify the default setting for a particular printer, use the â € ™ printers and fax 'of the Windows control panel to change the printing preferences in the Printer owner dialog box. Changes made from version 6.9.1 to 6.10.2: added the support for the search for addresses based on postal code in the United Kingdom and in the Netherlands. This is available in compatible products, such as City Navigator Europe NT V8 and subsequent versions. Not all Mapsource products will be able to use this function. With compatible products, as a new card in the dialog box â "find places." Added the graphic modification of the tracks. For edit tracks, activate the track editing toolbar by going to âView->Show Toolbars->Edit Tracks'. Adding the ability to select the display color of a track. This affects the way tracks are displayed in MapSource and units compatible. Tracks previously imported from some units (such as Quest 2) 2) introduce himself as black. This has been fixed for tracks just received by these units, but previously received tracks will have to be changed manually. Modified the design of interstate and highways so that the width of the line changes according to the zoom level of the map. Added support for inserting Japanese addresses in Kanji and Kana in compatible map products. Modify to fix a problem running MapSource on specific Windows locations, such as Chinese (Hong Kong S.A.R), Chinese (Macau S.A.R), and Arabic (U.A.E). Edit to fix a problem by displaying pathway waypoint properties in Dutch MapSource. Edit to increase the accuracy displayed in the proximity settings in the Waypoint dialog. Changes to make creating error reports more robust. Edit to remember the layout setting âPortrait' or âLandscape' for printing. Modify to provide more robust communication with Pocket PCs, such as iQue M3 and M5. Communication errors generated when talking with the iQue M5 are often caused by software problems with the iQue M5. A software version for the M5 to solve this problem is now available. Edit so that the routes calculated in MapSource do not cause driving direction problems on some units, such as the Quest. Modify MapSource to be compatible with Garmin 512MB data cards when the card is in the unit and the data is transferred to the unit (via USB or serial). Garmin 512 MB data cards are not currently compatible with the USB data card programmer. Modified the itinerary dialog so that it does not prevent name changes that differ from case to case. For example, âmy path' can now be renamed to âmy path'. Fixed some problems with Dutch and Norwegian translations. Fixed an issue where the Reset button in the window atanidro atanidro are eppam adehcs al iuc ni amelborp nu otlosiR . Ãteirporp orol ellen etazzilausiv eirogetac essets el noc ihgoul avorT ogolaid id artsenif allen Ãtilanoiznuf id ipit inucla eravort id amelborp li otterroC .ipmac i ittut etnematterroc avallecnac non ihgoul avorT ogolaid After inserting or removing the selected maps. Fixed a problem with the creation of estimates of the map size when the product of the map contains dem data. Fixed a problem with the reporting of elevations of small water bodies in detailed maps of map products that contains dem data. A problem relating to the display of ports of port services with limited information in marine maps was solved. Changes made from version 6.8 to 6.9.1: modified to unite the data received from a GPS in the current document. Several icons were added then, including summit, reference point, arena/track, sports center/fitness, town hall, parts for retailers/cars and bowling center. Added the possibility of viewing the data contained in the current document in Google Earth, if installed. Added support for the import of Loc files. The product restrictions dialog box was added, displayed when you open a map product with limitations imposed by the license limitations with the map data provider. Best errors reporting during communication with Pocketpc devices. The path preferences page has been modified to use a simpler road selection preference. Modified to not view the profiles of detailed maps when displaying areas not installed (in a partial installation). Modified to notify the user when are not valid data are received by a GPS, so that the user can correct or remove such data from the GPS. The unit has changed for the speed from '' Ã¬ â¬ ã â â â â â â Ã "KPHATA^â â â â â ã ¢ Â a '0ã ¢ âvelop ... Â" km/hue ¢ â â â The Splash window (displayed at the start of the program) was modified to view it on the same monitor on which the program will be displayed, in multi-monitor configurations. The product information dialog box has been changed to allow its rep rep adiug id inoizacidni el noc amelborp nu otlosiR .aiccarT ogolaid id artsenif allen aiccart alled otnup omitlu'lled enoizomir alla ovitaler amelborp li otlosir otats Ã .assomir atats ¨Ã aiccart alled ogolaid id artsenif al ehc opod aiccart id itnemges id enoizeles anu id enoizazzilausiv al noc amelborp nu otlosir otats Ã .etnetu itad ied ocnele'llen elibisiv are non appam allus SoÂÂÃÃetnetu nu id itad ied enoizeles al iuc ni amelborp nu otlosiR Â ÃÃ^ÃnoitavelE dilavnIÃÂÂ¢ÃOÃ id ecevni Ã¬Â ÃenuL ruotnoCÃÂÂÂÂÃ agnirts al erazzilausiv id onotnesnoc acirtemitla atouq id itad aznes etacifidom onrotnoc id eenil eL They require a number of unnamed roads. Fixed a problem with certain key stroke combinations in the Trace dialog box. Fixed a problem with selecting the wrong track segment on the map when many track segments are close. Fixed an issue where a selected track point was obscured by the scroll bar in the track dialog box. Fixed a drawing artifact that might be caused when viewing a context menu with respect to user data. Fixed an issue where addresses in multi-language products were not found when city names were in certain languages. Fixed a problem with creating a waypoint on certain features map when the map language is not the same as the computer language settings. Fixed the problem with the UTC offset that is not correctly remembered in the tidal forecast dialog box. Fixed problem with parking and rest area labels that do not show up correctly in some NT maps. Fixed an issue that exported a GPX file that contained a waypoint with custom symbol 31. Fixed a problem with sending NT maps to Palm devices. Resolved the "Find Locations" dialog to properly manage states occurring in multiple countries¹. Fixed a problem with the Waypoint symbol that is not updated on the map when Ã was returned to the original symbol in the Waypoint dialog box. Fixed a problem with duplicate street names shown in pop-up windows. Changes from version 6.7 to 6.8.0: This will be The latest version of Mapsource to support reading/importing PCX5 files. For future compatibility, migrate your data to GPX format. Fixed the error with the specification of some states or countries in searches in the dialog of the places of research ". Fixed the problem with the eznereferp eznereferp elled gnituor id adehcs allen isrocrep ilautneve icsitseGâ ¬â £Ã anoizeles ,itnemative ilga eredecca reP .aera'lled inoizative id e osrocrep id edarts id atnuiggA :7.6 a 5.6 enoisrev allad etatroppa ehcifidoM .iremun ert erazzilitu rep enoisrev id oremun li otacifidoM .eugnil ¹Ãip ni imon onnah ehc iseap o itats onazzilitu ehc ehcrecir el noc amelborp li otlosiR ."ihgoul avorT" ogolaid len iseap o itats eranoizeles id odarg ni eresse Once created, avoidance are displayed on the main map, if appropriate, for the product of the current map. Addition of the option is... Â "Auto'At'eata Âº for viewing solutions to avoid the routes. This hide the avoidance of the route when the map is enlarged enough. New symbols of Waypoints and maps have been added "è ... large Select these symbols on the View (Display) tab of the preference dialog box. Personalized Waypoint symbols can now be 24x24 and 32-bit color as well. Added the possibility of showing or hiding the left box (user data). Added Descriptions of the commands to the symbol selector of the path point with the name of the type of path point. Added celestial information dialogue. Extension of the scheme added to GPX for the management of specific data elements of Garmin, such as the depth of the path point. The path of the scheme is documented in the generated GPX files. GPX Garmin extension update (GPXXV1) to version 2 (GPXXV2) according to the comments. GPXXV1 does not be supported. Added the possibility of manually setting the Endpoints of the Y axis on the tracks of vertical profiles. Added `Â`,`  `à Â" Rest Area for Added symbols of artificial barrier map and oil platform. Real time detection removed from Mapsource. Use Nroute for real -time detection applications of the PC. Several improvements were made to map rendering performance. Improved algorithm for the selection of maps around tracks and paths. Better errors management during data transfer to removable supports and Garmin cards. Improvement of the precision of the Auto -Upper hell. Improvement of Mapsource's behavior Change relics, obstructions and isolated dangers to view the depths of point When known. To activate this function, turn on it is ’’ â ¢ âvelop ... Â “Spot Soundings'^âvelop on the display page of the display. Mapsource has been modified to use Windows XP styles in PCs that support this functionality. The vertical profile of the track was modified in order to use the same graphic representation of the vertical profile of the track. The 'Find types of category' are not more displayed when they are â²/\ not valid for a particular map product. Change to optimize the elimination of more path points from a route. If desired, he added a new automatic configuration option to avoid carpool lanes. Note that this function is Supported in all MAP products. The button is modified''H † 'âvelop ... Â "OKEUEHAUE HAIâ'H a button’ # ’’ \ âvelop ... Â "Close for ,To reduce the confusion of the user on how to get out of the dialog box of non -modifiable properties (such as the tide forecast dialog). Added the possibility for a user to be able to automatically select all the adjacent maps on a route, trace or travel point. Drawing code modified so that the maps of the maps are now designed above the GPS data as routes and traces, but still appear under the labels of travel points and the marker of the search results. Management arrows on selected routes have been added so that it is easier for users to discern the direction in which a selected path is going. Lowered the minimum speed on the unstopphеousing property page to allow the use of more realistic speeds to generate paths using alternative vehicles such as pedestrians and bicycles. It also increased the maximum speed to allow greater flexibility to the user in planning the path. Classifications of categories and sub -categories were added to the pages of the owners for the map features. Cié was made to help users better understand the classification scheme and be able to use it in the characteristics found. Added the possibility of enlarged the sections of a path profile. Reorganized categories used in dialog boxes 'Find places' and 'finds more close places' to make the search for elements more intuitive. A reset button was added to cancel the search parameters fields in the search dialog. Have the menu commands have been modified?. Now we have the command is # ‘ã ¢ âvelop ... Â" MAPSOURCE HELPATE ,Â" â â Â Â Â Â CIRA it was necessary due to the changes onais onais ,opit lad etnemetnednepidni ,elif i ittut ehc odom ni otacifidom ecruoSpaM .etuor alled adipar atlecs id unem len itneserp eresse onoved non etuor alled ehcificeps non unem id icov el e)etnetu'lled ortsed etnaslup li noc cilc af odnauq esuom li ottos alleuq(spg Ãtilanoiznuf anu a olos aciippa is appam artsenif allen adipar atlecs id unem nU :itnematropmoc itneuges i ereva rep appam artsenif allus cilc af odnauq eneitto etnetu nu ehc adipar atlecs id unem li otacifidoM .ametsis id adiuG alled elif id inoiznuf enucla id otnematropmoc len tfosorciM ad in the list of open files that are more recently on the File menu. Added the ability to create points of passage with known altitudes in any arbitrary position on maps that contain elevation data. On these cartographic products, the previous versions of Mapsource filled the altitude field only in the waypoints created on the contour lines or on the point features that had a known altitude. Removed the option for sending ground shading data to the GPS from the map card. The determination to send this information will now be carried out automatically according to if the GPS the maps have been sent to support it. A technology was added to the research dialog for searches of addresses and intersections that exclude the city from the list of available city to which information on the road is not associated. The process of transferring maps to a GPS device is modified so that Mapsource checks to make sure that it can successfully unlock all the maps transferred to the destination GPS before starting the long phase of creating the index. Ciè prevent customers from having to sit in the index building of their map set and then discover that some maps are unable to be unlocked (and therefore unusable) on their GPS. The column label in the card previously labeled as is changed as if it's... Â “Waypointsã town to be labeled as is labeled âvelop ... Â. Improved the text of the error that a user gets when a writing operation on a USB card programmer cannot check. Some improvements to the automatic detection code of the device have been added to reduce the probability of errors during the search for user devices. Edit of the behavior of the path dialog box so that if a user interrupts the calculation of the driving directions when clicking on the tab of driving, remain in the points tab and do not see the driving directions tab with empty driving indications. Removed the term `^â►... Â “not dangerous in the^â, which was in the description of some characteristics of the marine map. Inserting an improved error report to assist the user in case of problems during the transfer of a map map odnauq eradrocir ad oniciv ¹Ãip avorT ogolaid id artsenif al otacifidoM .tniopkcart ied ocnele'llen e emoN opmac len onanoiznuf itnemurts ilged arrab alled iniznuf el ehc eripac itnetu ilg rep elicaf ¹Ãip ais ehc odom ni aiccart alled Ãteirporp elled anigap allus itnemurts ilged arrab al eranoizisopiR .enidutitla'llus inoizamrofni onodulcni ehc PAM ittodorp inucla ni elibinopsid Ãras otseuQ .appam allus esuom li arbil etnetu'l odnauq otats id arrab allus omaizzilausiv etnemlautta ehc enoizisop allus inoizamrofni ella enoizavele id inoizamrofni etnuiggA .opmet otlom onodeihcir ehc itreper i erepmorretni id Ãtilibissop al aibba etnetu'l ehc odom ni "oniciv ¹Ãip avorT" e "ihgoul avorT" otacifidoM ."eniciv ¹Ãip avorT" ehcrecir el erarelecca rep "aniciv ¹Ãip avorT" acigol al otacifidoM .elatsop ecidoc nu otinrof eneiv odnauq ehcrecir el erarelecca a eratuia rep redniF acigol alla elatsop ecidoc led ortlif eroiretlu otnuiggA .etnemacitamotua itavelir onognev ehc ivitisopsid ied ocnele'llen itazzilausiv onognev ehc ilibivomir ilaidemitlum ivitisopsid ied ataroilgim enoizircsed anu atnuiggA .otazzilausiv eneiv iuc ni opmac li rep ognul opport are odnauq pmatsemiT agnirts al etnematterroc eracnort rep tniopyaW ogolaid id artsenif al otacifidoM .osrocrep led otnemirefsart li otlosir otats Ã .assomir atats ¨Ã aiccart alled ogolaid id artsenif al ehc opod aiccart id itnemges id enoizeles anu id enoizazzilausiv al noc amelborp nu otlosir otats Ã .etnetu itad ied ocnele'llen elibisiv are non appam allus atrepocs al ehc odom ni(ecruospaM ni tniopyaw onos ic non otnemom la es atazzilausiv eneiv non "stniopyaw" airogetac id enoizpo'l ehc odom ni "aniciv ¹Ãip avorT" ogolaid id artsenif al otacifidoM .etnenetnoc" opmac len ecov anu atigid Denif' ehno eussi dexiF .selac

Zealand grid used an improper convergence algorithm. Fixed the problem where the scroll bar was not displayed on the GPS tab with a 640 x 480 resolution. Fixed the problem that caused the status bar text to be truncated in the main frame of the Mapsource window. Fixed the problem where the status bar would flash when the mouse is moved to the screen. Fixed the problem where the status bar did not "reset" in some cases after displaying a dialog box. Fixed the problem that causes distance measurement to display distances in the status bar with too little accuracy. Added code to prevent Mapsource from loading improperly formed routes from GPS devices (those routes that have a path node as the first waypoint, a known problem in some GPS devices). Added the cardinal direction as a new header type in the Unit Preferences tab. Fixed the issue that prevented the user from importing paths with a large number of duplicate waypoint names. Tide forecast changed so that the Tide dialog box is now displayed using the context menu command "Properties function" instead of having a unique command. Mapsource changed so that the depth of the BlueChart point are now centered. Added map transfer support to removable media (compact flash, secure digital) on USB. Modified the device transfer interface so that each device type is listed in a separate menu command. This command opens a dialog box that contains only transfer options specific to that device type. Menu commands are individually or disabled depending on whether the user can send or open from a specific device type. Open modified by GPS and save the GPS command buttons to be the drop-down buttons that allow the user to select the device type to transfer from a list of available device types. This opens the same dialog box specific to the device type mentioned above. On for the button itself is to open the dialog box for the last device type used for a transfer. The user will no longer be able to send Maps to a device if no maps are selected. Adding Functionality to erase the Garmin memory card. MapSource behavior changed so that if the user attempts to open user data (such as maps, access points, paths and tracks) from a GPS device and the GPS device does not contain any of the selected data, the user is informed of the problem and the transfer is terminated. Previously, MapSource did not open anything, and then it would say, Ã ÂÂ Ã ÂThe data was successfully openedÃ ÂÂ². The prompts were removed from the Selected Maps tab that would display the text Ã ÂÂ ÃÂ(may not fit)Ã Â Â or '(may be too many)' after the selected map count/size, because Ã© ciÂ² may be misleading for users who had multiple¹ devices to which they were transferring data. Adding capacity to send waypoints, paths and tracks and read them from Garmin memory cards. Moved the selection of the device used for real-time detection from the transfer preferences tab to a dialog box opened by a button on the GPS tab itself. Â the check box for including auto-routing data in map transfers has been moved from the transfer preferences tab to the map tab, where Ã9Â¹ is more easily accessible to the user. The behavior was changed so that it is disabled unless the user selects the maps that make this decision necessary. The Transfer Preferences tab was removed from the preferences dialog because it is no longer used. Added a new waypoint symbol for Water Hydrant. Added types of maneuvering to manage driving directions when exiting 5-8 exit in a otaredisnoc otaredisnoc ah non e ,acitamotua arusets id inoizamrofni el odnedulcse ,inoisnemid ella esab ni otarre odom ni eppam el otanidro ah etnedecerp enoisrev aL .atazzilausiv appam alled enoisnemid alla esab ni etanidro onais eppam el ehc odom ni etacifidom eppaM adehcS .itnereoc oressof ehc odom ni itaicossa itset i ittut otacifidom aH .ottodorp ni otacifidom otats ¨Ã azzilausiV unem len aera'lled emoN unemottos II .elacitrev aiccart alled oliforp len e aeram alled ogolaid id artsenif allen otnemirrocs id errab alled atterroc non enoizazzilausiv noc otlosir amelborP id artsenif allus enoizitepir/otnemallunna id Ãtilanoiznuf al ehcna atnuiggA .osrocrep led ogolaid id artsenif allus itnemurts ilged arrab avoun anu odnazzilitu itnup etimart eracifidom/eranimile/erallocni/eraipoc/erailgat id Ãticapac al atnuiggA .osrocrep li rep ogolaid id artsenif alled onretni'lla itnup etimart erazzinagroir rep Ãticapac atnuiggA .osu'd Ãtilicaf e etaroilgim Ãtilanoiznuf eratroppus rep icirtom inoizerid e otnup etimart etarapes edehcs ni osrocrep li rep ogolaid id artsenif al erediviD .mlaP euqI nimraG ovitisopsid led aruttel id eccart el rep otroppus otnuiggA .mlaP euqI nimraG ovitisopsid la eppam id oivni'l rep otroppus otnuiggA .otterid gnituor id elits ol anoizeles etnetu'l odnauq etatilibasid onos otterid gnituor la ilibacilppa onare non ehc inoizpo elleuq ,ertlonI .etnetu azneirepse'l eracifilpmes rep adehcs atseuq ni inoizpo elled enucla otazzinagroiR .gnituor ni gnituorotua id eznereferP adehcs alled emon li otacifidoM .ehcitaisa swodniW emrofattaip us SPG ivitisopsid itanimreted ad itnetu ilged itad i ereggel id Ãticapacni'l noc amelborp nu otlosiR .enoisnerpmoc al e osu'l elicaf ¹Ãip eredner rep ogolaid otseuq otazzinagroiR .ivredecca rep otazzilitu otaicossa unem id odnamoc li ehcna otacifidoM .occolbs id inoiger ella occolbs id icidoc iad paM nimraG ittodorp ied ihccolbs ilged enoitseg al rep atazzilitu ogolaid id artsenif alled emon li atacifidoM .elaer opmet ni oiggarotinom li etnarud aiccart id otnup nu otnuigga avinev ehc atlov ingo ocnele'lla onif averrocs kcarT evitcA ogolaid id artsenif allen itnup ied aiccart al iuc ni amelborp nu otlosiR .elaer opmet ni oiggarotinom len avitta aiccart al are odnauq aiccarT ogolaid id artsenif allen etnematterroc itatilibasid onavinev non areitsat alled erotarelecca'lled itsat i e ortsed cilc led elautsetnoc unem li iuc ni amelborp li otlosiR .erazzilausiv ad appam alled enoisnemid al eranimreted rep atazzilitu atats ¨Ã enoizeles atseuq es ehcna itad i eredulcni rep etnetu'lled enoizeleS of the path for these processes. Keyboard shortcuts supplied and click with the right mouse button on access to the context menu for these menu controls. Added the possibility of printing road indications from the driving indications tab. Remove the Insert Waypoint button from the Dialogue Dialog of the Paths Poiché © Now you can perform the addition of Waypoint using the Trova button. Mapsource does not allow the user to add Waypoint to the route that translates into a consecutive duplicate via via via to the finder dialog. The traditional finderÃ¢Â€Â¬Ã¢Â€Âs capabilities are now referred to as Ã¢Â€Â¬ÃÂÂFind PlaceÃ¢Â€Â¬ÃÂÂ. It has been replaced by a dialog with multiple tabs separating the various types of searches that the user can now perform including: Feature, City, Address, and Waypoint. New waypoint search type is only available when there are waypoints to search. Added Ã¢Â€Â¬ÃÂÂspell and findÃ¢Â€Â¬ÃÂÂ searching for states and countries to allow for selecting the name of a state or a country from a list as was previously done with cities. Added category and subcategory feature searching parameters. This allows for users to search for specific categories of Points of Interest with or without additional information. The new feature search now allows for searching by name without specifying a City, State, or Country. Address searching was modified to rank searching results by the Ã¢Â€Â¬ÃÂÂqualityÃ¢Â€Â¬ÃÂÂ of the match. The previous version showed results in alphabetical order. Added the find nearest capability to allow users to do searches around a specific point on the map. Added the find recent capability, which stores the results of recently performed searches and allows the user to navigate through this list and more easily redo frequently performed searches. Added user preference settings for the new finder capabilities to a Find tab in the preferences dialog. Added the ability to be able to create waypoints from found results directly from the finder dialog. Changed find dialog so that it remembers the last input value in each of the finder fields. Added menu command and toolbar button for doing a find nearest search starting at the center of the map. Reworked the city finder dialog so that it is more consistent with the behavior of the other finders. Provided the capability to better negotiate higher baud rates for serial map transfers to the GPS Device. Fixed an issue where the allowed range of values for the custom speeds in the routing preferences tab was not being Tnacifingis eat Fixed the problem where the menu item Â0ÂÂÂNew TrackÂ0ÂÂ Â did not show a description of its action in the status bar. Fixed the problem where MapSource would not respond to the Enter key that is pressed on the buttons in some cases like on GPS and Maps cards. Fixed the problem of not being able to scroll the controls on the GPS card. MapSource error log entries changed so that all future entries include the application name. Ã an error message was added to inform you when no mapping products were installed. Added support for viewing Scrub, Tundra, and Orchard region types. He modified the fatal dialog so that user instructions were more appropriate¹ in both beta testing builds and final releases. Fixed issue where MapSource failed while transferring routes and route points from certain units when some of the location points had proximity information. Amendments 4.12 to 4.13: Integrated translation corrections by Taiwan to traditional Chinese, Korean and Japanese resources. Ã Fixed an issue where the tidal forecast calendar control did not work properly in certain date ranges when Windows was set to a time zone that was automatically adjusted for daylight saving time. Ã fixed a problem where MapSource allowed tidal forecasts to be made outside the appropriate time-interval restrictions imposed by the current tidal forecast code. CiÂ² would lead to invalid forecast values for out-of-range times. Fixed an issue where MapSource would block if the registry value that stored user preferences for units from MapSource 4.09 and earlier contained an invalid value. Changed 'Car' to 'Car/Motorcycle' in autoroute preferences. Cursors modified for adding, moving, replacing, and inserting points in paths using the selection pointer to display a graphic signal instead of English text labels. Added new waypoint symbols (contacts) for Rino. The version of the MPS Ã file format has been updated to 1.04. Note that MPS files saved with 4.10 are not compatible with earlier versions of MapSource. MapSource modified so that waypoints created by the route tool follow user preferences for the mode display settings on the waypoint preferences tab. The Transfer Preferences page was modified so that users who do not have serial ports do not get locked in an infinite loop and that an invalid input prompt appears repeatedly if they enter this page. The automatic routing progress bar now appears only when you generate routes with maps that contain auto routing information. Added check box for including AutoRouting information when transferring data to and from a device in the transfer dialog box. A duplicate of this check box has been retained on the transfer preferences page. This new checkbox Ã was added to simplify the process of not including the auto routing data in a transfer to a device after the user Ã was asked that the map size was too large for their unit And he said they should try to remove the automatic routing data for the transfer. Modified the Export dialog box so that the option to export to DXF files is not available if only maps are selected. of the processing cycle was updated to correctly export automatic drafting. Correct bug in the path ownership dialog box that caused Mapsource's error when an unreas offered profit was placed. Correct bug in the track ownership dialog box that caused the inactivation of the exhibition button on the map when the song has a single point. Some bugs were corrected in the vertical track profile dialog in which the graph is displayed incorrectly in certain zoom situations. In previous versions, he selected the next waypoint in the list whose type of symbol began with that letter. Visual progressive is provided on both the map window and on the waypoints, paths and traces so that it is more obvious for the user who has the focus of input. Modified Waypoint cards, routes and traces on the main application so that that ilatats edartsotua el rep 'ywH' eredneperp arocna ertnem ,'ywH' eredneperp non rep)aporuE ni elleuq oipmese da(ehcireneg edartsotua ellus otacifidom pu-pop otseT .arutrepoc al edrep BSU 53 SPG odnauq etnacnam "etnedacs elangeS" enoizacidni'l noc amelborp li otlosiR .elif elat eneitnoc ottodorp li es ,elanif etnetu'l noc aznecil id ottartnoC nu oipmese da ,ottodorp nu id osivva id elif li erazzilausiv id Ãtilibissop al atnuiggA .etuor ÃteirporP ogolaid id artsenif allen tniopyaW acifidoM etnaslup li odnazzilitu otacifidom otats ¨Ã osrocrep id otnup nu id emon li es ebberehccolb is ecruoSpaM iuc ni ottefid otterroC .elatnedicco aporuE'lled augnil ni non ivitarepo imetsis us etnematterroc otazzilausiv otats ¨Ã non odarg led olobmis li iuc ni ottefid ossiF .onu us alubat is etnetu'l odnauq teS paM e kcarT ,etuoR ,tniopyaW ogolaid id artsenif ellen acifidom id ellesac elled enoizaiznedive atacnam al otasuac ah ehc gub otterroC .etuor allen itnup onare'c non odnauq itatilibasid etnematterroc itats onos non 'appam us artsoM' e 'itrevnI' ,'aloclaciR' itnaslup i iuc ni gub otterroC .enoizisop a iaV ogolaid id artsenif allad omrehcs ollad ericsu a evan al otasuac ah etnetu'l odnauq atanoizelesed atats are non appam allus olociev li erenetnam rep ollortnoc id allesac al iuc ni elaer opmet ni otnemaiccart len amelborp li otlosiR .appam alled enoizazzilaizini id esaf al etnarud BSU otnemirefsart nu ottorretni ah etnetu'l odnauq ecruoSpaM id erorre'l otasuac ah ehc gub otterroC .appam anucla atanoizeles atats ¨Ã non odnauq acitamotua arusets alled erorre'l otasuac ah ehc gub nu otterroC .tupni id ovitta otats ol ah appam alled artsenif al es elisnetu nu eranoizeles rep olos etazzilitu eresse onassop edipar etlecs etseuq ehc odom ni itnemurts ilg rep areitsat ad edipar etlecs el onanoiznuf iuc ni odom li otacifidoM * .arettel alleuq noc aizini ehc emon nu ah ehc ocnele'lled ecov amirp alla onif errocs ,arettel anu atigid etnetu'l e tupni id ovitta otats ol ah edehcs etseuq id anu United States. The behavior of MapSource Ã was changed so that clicks are handled consistently with other Windows programs when the mouse is activated. (That is, if the mouse click is on the Minimize, Maximize, Close, or System button, it responds immediately to the click. If the mouse click is in the client area, such as the map or scroll bars, MapSource is enabled only without further processing.) Done The automatic drafting function to correct a bug in which Mapsource would not respect access restrictions on certain service roads during the calculation of a route. Logic added to manage situations that occur when the user goes to a map product installed whose request codes request is not supported by the user's operating system. If this situation occurs, Mapsource signal the user problem and pass it to 'no map'. The predefined value modified for Finder address corresponds to 100 instead of 25. Correct bug that caused Mapsource's error when the user would have changed the ID Route in the Route dialog box and then try to view the route on the map from Quick choice menu. Correct bug in the selection dialog box of the passage point in which the user selection would be highlighted, but not made visible, if the selected passage point was not already visible in the window. Some optimizations have been added to increase the automatic drafting speed. Management of the auto -seruter of the data problems present in some maps of maps has been improved. Fixed the problem relating to the incorrect management by the auto -seruter of an error reported by the database. Autorouting modified in order to correctly direct pedestrians against the flow of traffic on one -way road roads. Correct defect in which PCX files were imported incorrectly in some international settings. The problem relating to access to certain types of character through the characters dialog box was solved, which does not allow you to correctly view maps labels. Fixed the problem relating to the list of incorrect quick choice keys for the display of elements selected on the map in German resources. Correct bug that caused Mapsource's arrest if two symbols .ehcitaisa .ehcitaisa eugnil el rep etnematterroc oninoiznuf acrecir id enoiznuf al e aifargotro'l ehc odom ni onirim led ogolaid id artsenif al atacifidom ertloni atats Ã .itseihcir itad ied avacnam etnerroc appam alled ottodorp li es itavittasid oressof aifargotro'l e Ãttic e izziridni id acrecir al rep itnaslup i ehc odom ni atacifidom atats ¨Ã onirim led ogolaid id artsenif aL .appam alled artsenif alled odrob la oniciv Ãtilanoiznuf el arpos odnassap avats etnetu'l odnauq pupop ertsenif elled enoizazzilausiv al etnarud otaccolb ¨Ã is ecruoSpaM iuc ni gub otlosiR .emon ossets ol onaveva Created from version 4.08 to 4.09: a problem solved in which Mapsource viewed a fatal dialog box if the user tried to view the ownership of the marine graphs for a graphic designer with dates prior to 1970. Best map order order. Some maps on a larger scale drew on maps on a small scale. Changes made from version 4.07 to version 4.08: a problem that caused the concealment of the index column in the dialog box of the passage of the song. A problem was solved that caused Mapsource's error when clicking on the 'Show on Map' button in the track ownership dialog box and the song was empty. A problem was solved that has sometimes caused an apparent continuous cycle if the name of a route contains non -valid characters and the closing button was selected in the route ownership dialog box. A problem that caused Mapsource's error when some routes were automatically generated. Changes made from version 4.06 to 4.07: made various improvements to the tide forecast dialogue. The altimetric altitude lines have been made more read in topographic maps. Fixed the problem that caused some errors in the information displayed in the product information dialog box. Fixed problem that allowed documents to sometimes contain access points with non -unique names that caused a problem during the transfer to the GPS. Solved the problem that causes the interruption of file export operations. The display of the depth values has been modified in order to always have a resolution of tenths. A problem that caused the incorrect import of the symbols of the access point from PCX5 files was solved. The track design has been changed to view the actual track points when the zoom is The 'Time' Ã was added to the Preferences dialog box to allow the user to choose the time zone for the displayed times. Adding the ability Cut, copy, paste, and delete portions of tracks. The Properties dialog box of the location was changed to include a Cancel button and a close box. Ã the way the elapsed time is calculated for tracks to be the sum of the absolute values of the individual leg times. Modified trace drawing to add the possibility to highlight the selected part of the aidem 0,0 id Ãtimissorp id aznatsid anu ,5XCP enoizatropmi'l etnaruD .aiccart alled elacitrev oliforp li erazzilausiv rep aiccart alled ÃteirporP ogolaid id artsenif allen otnuigga etnasluP .elits ovoun id pihc itnenetnoc itad id edehcs noc eranoiznuf rep otacifidom BSU edehcs id erotammargorp ecidoC .ocitamotua osrocrep led oloclac li etnarud otnemallunna'l eritnesnoc e issergorp i erazzilausiv rep atnuiggA ogolaid id artseniF .appam alled Ãteirporp el erazzilausiv rep spaM adehcs allen evaihc otnematropmoc li erettemmi e cilc aippod acifidoM .appam alleuq rep Ãteirporp el erazzilausiv rep elautsetnoc unem id ecov anu ereilgecs e spaM adehcs allen appam anu us esuom led ortsed etnaslup li noc cilc eraf id Ãtilibissop al atnuiggA .ogolaid id artsenif al egnipser non tniopyaW ÃteirporP ogolaid id artsenif allen "paM no wohS" etnaslup lI .appam alled artsenif allen ilibisiv ehcifidom el etnemataidemmi erettelfir rep tniopyaW ÃteirporP ogolaid id artsenif al otacifidoM .aciremunafla adarts id iremun i noc eraroval rep atacifidom ozziridni'lled acrecir id Ãtilanoiznuf ."SS :MM :HH" emoc arocna onartsom ero 42 id onem ehc ednetse is opmet lI .'ss :mm :hh inroig n' emoc erartsom rep ero 42 id ¹Ãip ipmet ied enoizazzilausiv al otaibmac aH .enoisicerp id ilamiced 2 ereva rep otats id arrab allen etartsom eppam elled itad ied enoisnemid al otacifidoM .ecruospaM elibinopsid enoisrev amitlu'l erazzilausiv rep nimraG beW anigap al erirpa rep atnuiggA unem id ecoV .otavlas eresse eved non otnemucod li ,otallunna eresse rep allun elibinopsid ¨Ã non es ehc elat odom ni otnemallunna id Ãtilanoiznuf ataroilgiM ."attapmoc" enoizallatsni'nu esseva etnetu'l es ericsu idniuq e elif nu erirpa avetop non ehc ecruospaM id otnemirefir al otasuac ah ehc gub nu otlosiR .abmag alled otnup omitlu'l ©Ãhcizna abmag alled otnup omirp led aenil assets allus etazzilausiv onais ebmag elled ehcitsitats el ehc odom ni aiccart alled ÃteirporP ogolaid id artsenif al otacifidoM .otacifidom eresse Dialogue of the modified address to not request a number of address. Cié allows research only by the name of the road. Change of the preparation window of the transfer of serial data to view the current Baud speed. Fixed a bug that has sometimes caused the characteristics of labels on the line when it enlarges. Added dialogue to notify if the user is about to delete the recording track currently. Fixed a bug that caused Mapsource's failure if an unlotted unlock code has been added. Fixed problems that sometimes occurred when downloading maps. Added 'Center on selected item'checkbox to track dialog. Added update of the active track in the track dialog while real-time tracking. Changed to not draw gray outlines for locked maps. Added ability in the fatal dialog to copy the log file to the clipboard. Corrected ordering for sorting maps by size in the left-hand pane. Changed grid background color to light gray, providing contrast for maps whose water color is white. Added waypoint symbol code to PCX import. Added button on About dialog to give the user easy access to what versions of the USB drivers are installed on their system. Removed button to show the location of the MapSource log file. Corrected problem where basemap points were not being displayed but were being found for popups. Added flag to DXF file to force 3D polylines and their vertices to be imported as 3D into AutoCAD 2000. Fixed problem that sometimes caused MapSource to crash at startup. Added waypoint symbols for Geocache and Geocache Found. Added stronger warning when over-writing preprogrammed data. Changed to display an error message when the com port is not available for real time. Fixed a problem that sometimes caused MapSource to crash in various dialogs. Added support for finding marinas in BlueChart data. Changes made from version 4.00 to 4.03: Added real-time plotting capability. Added right-click context menus. Added right-click menu feature to retrieve the properties of exits, points of interest, facilities, and fishing areas. Added unlimited multilevel undo and redo. Added 'send mail' function to send an e-mail with the current document as an attachment. Added DXF export for graphics that cross the Equator and graphics that spread across more than one UTM zone. Added overzoom warning. Added preference for depth units (feet, meters, or fathoms). Import/Export functions now use the default directory (if one .tcudorp rotegan ytic yes or rof troppus dedda :00.4 ot 60.3 noisrev edam edam edah edah .esis attad last relllams a dleiy ot spam orf tluclac ot ot ot ot ot ot they Ton ,swagla snoiger Pam ElbadaolnWod ward tnah .Denepo Era Yehw STNUCOD SPM.
